SAFETY PHILOSOPHY

The primary function of safety is the prevention of incidents and/or injury to any of our employees.

The protection of the environment and preventative maintenance of equipment is also a factor in the philosophy of safety.

Management has the responsibility of organizing and maintaining the safety program in terms of achieving the program goals in an objective and efficient manner.

Each employee is responsible for working safely with equal concern for fellow employees.

The success of our safety program is dependent upon the contribution towards safety awareness from each and every employee.
